ICAO Aviation Security Global Risk Context Statement — Doc 10108 (Restricted)

1. A new edition of the International Civil Aviation Organization (ICAO) *Aviation Security Global Risk Context Statement — Doc 10108 (Restricted)* has been published in English and is now available on the ICAO-NET under “Publications” and “Documents”; other language versions will be published as they become available. This document contains a global aviation security risk assessment, including a global threat picture, and is intended to assist in informing and supporting ICAO Member States’ national and local aviation security risk assessment processes.
2. Please note that the six previous versions of the *ICAO Aviation Security Global Risk Context Statement* were published without a document number. In light of the evolving threat to civil aviation and its increasing significance, this new edition has been provided with an official document number (Doc 10108) in the catalogue of ICAO publications and is being reissued as a First Edition.
3. The *ICAO Aviation Security Global Risk Context Statement* should be made available to those who are responsible for conducting national and other aviation security risk assessments and aviation security decision makers, practitioners and other relevant stakeholders. Procedures for handling, transmission and storage of this document must be applied in accordance with each Member State’s regulations for restricted aviation security information.

Issued under the authority of the Secretary General
